1. Company

OGSOFT SOLUTIONS LTD is an integrated IT Software company providing direct healthcare and Business to Business (B2B) software solutions between several healthcare sectors. We aim to continue to build the mind-space for healthcare professional services and their customers to maximise their values using cloud solutions.

Our Vision: To become the foremost healthcare software solutions provider in Africa.

Our Mission: Designing and providing world class solutions that improve the health of the people in Africa.

OGSOFT SOLUTIONS LTD aims to work closely with its customers to deliver products that increase the long-term adoptability and fulfilment of users.

With OGCOIN (OGC), we aim to spearhead the healthcare revolution in Africa with a unique opportunity for the advancement of a unified HealthCare System through Blockchain technology. We have created this OGC to *allow participants* aid in the advancement of eHealth in Africa, by participating in investment opportunities in the *Healthcare sector* to bridge the many *existing gaps*.

2. Values

3. Our Locations

With operations based in Australia, Malaysia and an Office in Nigeria, we have the global perspective & expertise to design and deploy relevant, innovative and cutting-edge IT solutions that adds incredible value to our client base.

4. Problem Statement

According to the National Library of Medicine, the Africa region of the World Health Organization (which includes all countries of Africa, not just the low-income countries), per capita health spending was $83, less than 2 percent of the average spending in high-income countries. Whereas Australia (for example), have spent an estimated $202.5 billion on health goods and services in 2019–20 – this is an average of approximately $7,926 per person, according to Australia Institute of Health and Welfare (AIHW). This is where OGCoin tends to change the game.

Healthcare is a basic need for every person and a recent survey indicates that many people from both private and government hospitals make use of inefficient solutions to run their day-to-day operations, thereby increasing the relevance of OGSOFT SOLUTIONS LTD products as they bridge the gap and bring convenience closer.

5. What is OGCOIN?

OGCoin (OGC) is an ERC20 standard token built on Ethereum platform and network that creates access to OGSOFT SOLUTIONS LTD systems, used for a secure and decentralized approach of confirming transactions within their ecosystem of connected healthcare centers in Africa.

The token we have developed is a good conscience coin as OGSOFT SOLUTIONS LTD is a proud supporter of grass root projects. We are consistently working on ways to support innovation and entrepreneurs in Africa and throughout the globe. With OGCoin E-health Africa, this provides a platform for all investors to benefit from the healthcare in Africa without physically being there. While those who are in Africa will be able to utilize the OGCoin E-health Africa to make payments for treatments at Hospitals or Clinics that are using OGSOFT SOLUTIONS LTD systems. Currently, we have a total of 5 hospitals and 10 clinics using our systems mainly in ECOWAS and working towards expanding to other African regions by December 2023.

With OGC, we aim to give a taste of all the great benefits of blockchain technology and tokenization in the medical field to all Patients, Doctors, and Health Centers; we strive to continue to provide our services to companies in the health sector and leverage on this innovative solution. OGC also works fine as a day-to-day currency because it follows the ERC20 standard.

6. Market Segmentation

OGSOFT SOLUTIONS LTD range of products target five main tiers of users which are as follows:

a) **Government Health Care Providers**.
- Our main target, which is comprised of government hospitals and radiological centers. A Government Healthcare Provider is described as any medical institution that is wholly or partially owned by the Federal Government of Nigeria and or any other country we will expand to.

b) **Private Healthcare Providers (hospitals)**.
- Private institutes are usually owned by one or more decision makers who have a direct say as to the budget of the company. The organizations will usually outsource the imaging diagnostic services due to the size of the operation or their budgets. In some cases, they will have their own radiology services available inhouse.

c) **Healthcare Service Providers (radiology and diagnostic centers)**.
- Despite them being our target clientele the number of radiological and diagnostic centers and their sizes in terms of employees is very little. It is our opinion that we will be able to get them to use our service if their patients and the hospitals they serve are using the system.

d) **Patients.**
- With a population of more than 180 million citizens, Nigeria has a large patient population. This tier is key to our growth and thus a lite service that will allow them to use the system freely to make reservations, view the nearby service providers, reschedule their own reservations & receiving a vast range of medical services.

e) **You**
- An opportunity for all investors from OGCoin E-health Africa to aid in the company's vision and mission statement. While at the same time, benefit from the monetary compensation from the market value of the product.

7. OGSOFT SOLUTIONS LTD Products

A. **Megatron Healthcare Management System**

Our MegatronHMS Hospital Management System is a web-based application and can be integrated (using API) with other healthcare systems in the market. The System is designed to provide the best user experience for our users (hospitals/clinic) by centralizing patients information to those granted access and allows them to manage out-patients, in-patients, diagnostics, process inventory, accounts, consultation, dispense drugs and manage personnel with much ease.

Megatron HMS has been designed to streamline flow of information between doctors, patients and referring hospitals/clinics in Africa. The platform allows doctors to share patient information with any doctor the patient is referred to on the system before the patient arrives for their appointment with the patient's approval. Using artificial intelligence, MegatronHMS can use predictive analysis to assist medical professionals for diagnosis of patients and recommending

WHITEPAPER

solutions. With the accounting feature in MegatronHMS, it offers business insights for decision makers.

In a nutshell, by implementing these systems throughout the continent, patients and doctors can be assured that they have access to the best available treatment plans no matter where they are on the continent and that their information is securely shared with the appropriate parties prior to their appointments.

With OGCoin, this will be used to power MegatronHMS financial transactions across the continent and stakeholders worldwide. With this digital currency, patients will be able to make payments for their treatments using the token. This will benefit both the company, the practitioners, and the client in return.
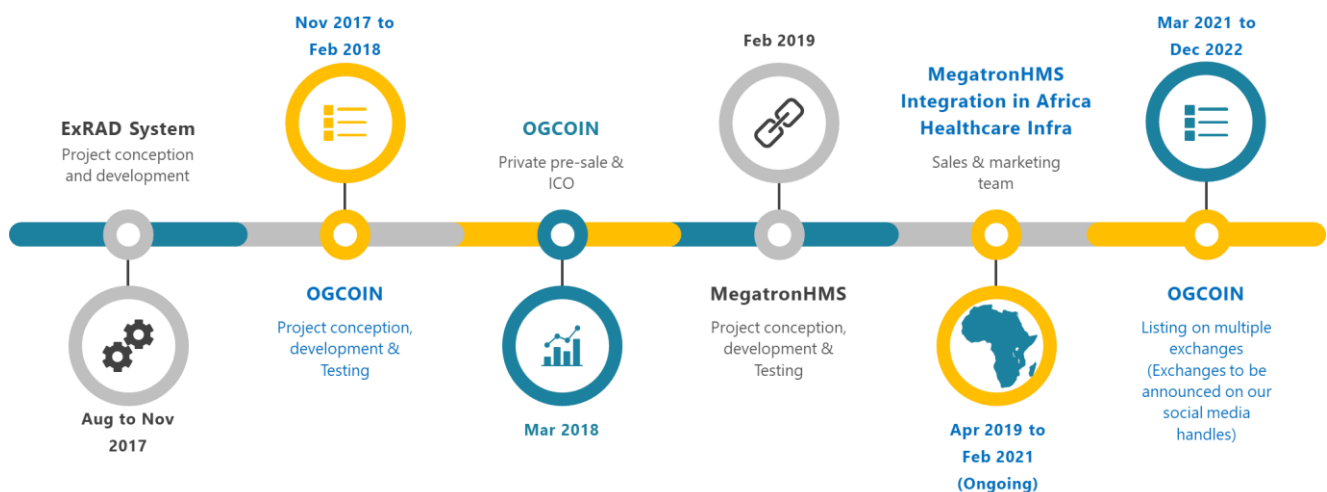

OGCoin is set to transform the African Healthcare industry by maintaining the wholistic way the healthcare industry keeps changing. This venture will solidify our position as the best healthcare system in the market while offering a larger market share for investors.

B. **EXRAD**

Our ExRAD system is PACS solution which aims to improve our client technologists' efficiency and enhance their patient care by providing flexible mobile, tablet or desktop access to RIS workflows. ExRAD is delivered on a secure browser-based platform that allows technologists to bring the patient information system with them to the bedside. No longer tied to a shared desktop, your staff can offer improved patient experiences with real-time access to information.

8. OGC Road Map

9. Legalities & Disclaimers

i. **OGCoin (OGC) are not securities**:
   User acknowledges, understands, and agrees that OGCoin E-health Africa are not securities and are not registered with any government entity as a security, and shall not be considered as such. User acknowledges, understands, and agrees that ownership of OGCoin by OGSOFT SOLUTIONS does not grant the User the right to receive profit, or other payments or returns arising from the acquisition, management or disposal of, the exercise of, the redemption of, or the expiry of, any right, interest, title or benefit in the OGCoin platform or any other OGSOFT SOLUTIONS LTD property, whole or in part.

ii. **Absence of guarantees of income or profit**:
   There is no guarantee that OGCoin (OGC) by OGSOFT SOLUTIONS will grow in value. There are no guarantees that the price of OGCoins will not decrease due to some unforeseen events, or events over which the developers have no control, or because of force majeure circumstances.

iii. **Risks associated with Ethereum:**
   OGCOIN (OGC) are ERC20 utility tokens that will be issued on the Ethereum blockchain. Therefore, any failure or malfunctioning of the Ethereum protocol may lead to the trading network of OGCoins not working as expected.

iv. **Regulatory uncertainty:**
   Blockchain technologies are subject to supervision and control by various regulatory bodies around the world. OGCoin (OGC) by OGSOFT SOLUTIONS may fall under one or more requests or actions on their part, including but not limited to restrictions imposed on the use or possession of digital tokens such as OGCoin (OGC) which may slow or limit the functionality or repurchase of OGCoin (OGC) tokens in the future.

v. **OGCoin (OGC) tokens are not an investment**:
   OGCoins (OGC) by OGSOFT SOLUTIONS are not official or legally binding investments of any kind. In case of unforeseen circumstances, the objectives stated in this document may be changed, as will be indicated by a change in the content version in the footer of this document. We intend to reach all goals described in this document. However, all persons and parties involved in the purchase of OGCoins (OGC) do so at their own risk.

vi. **Risks of utilizing new technology:**
   OGCoin (OGC) by OGSOFT SOLUTIONS is a new and relatively untested technology. In addition to the risks mentioned in this document, there are additional risks that the OGSOFT SOLUTIONS LTD team cannot foresee. These risks may manifest themselves in other forms of risk than those specified herein.
